KPI (user manual)

This application has two modules:

- Insert data (intranet app)
- View Data (KPI report) COGNOS

INSERT DATA

In this module users can see and maintain the business areas only if they have writing privileges.

Importat: This module is not useful to see other business areas or companies.

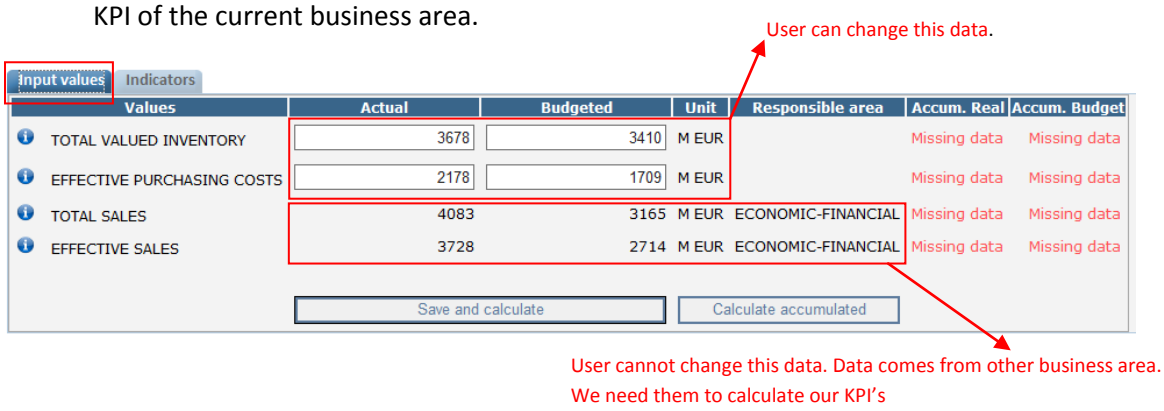
Steps for using the app:

For each month user has to follow three simple steps:

1º Fill in monthly input values (budget and real)

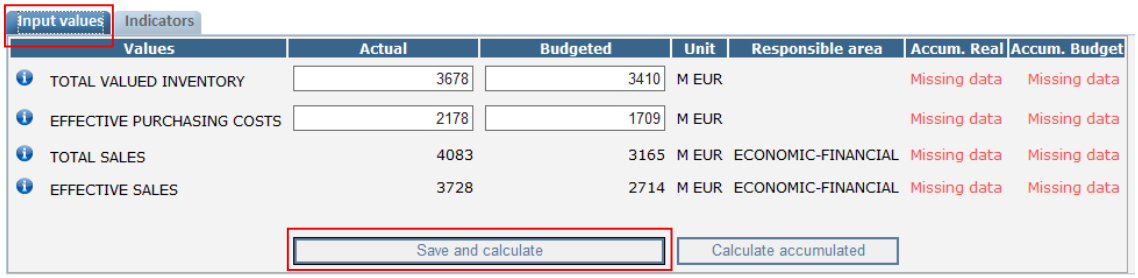
The input values are necessary to calculate KPI's. There can be two types of input values:

- Those the user can change.
- Those which belong to other business area **but** they are necessary for calculating the KPI of the current business area.



2º Save and Calculate Monthly KPI's (budget and real)

When user save data, the application will save data and also it will try to calculate all the KPI's of the business area.



Values	Actual	Budgeted	Unit	Responsible area	Accum. Real	Accum. Budget
TOTAL VALUED INVENTORY	3678	3410	M EUR		Missing data	Missing data
EFFECTIVE PURCHASING COSTS	2178	1709	M EUR		Missing data	Missing data
TOTAL SALES	4083	3165	M EUR	ECONOMIC-FINANCIAL	Missing data	Missing data
EFFECTIVE SALES	3728	2714	M EUR	ECONOMIC-FINANCIAL	Missing data	Missing data

The program calculates Monthly KPI using the defined formula for each indicator

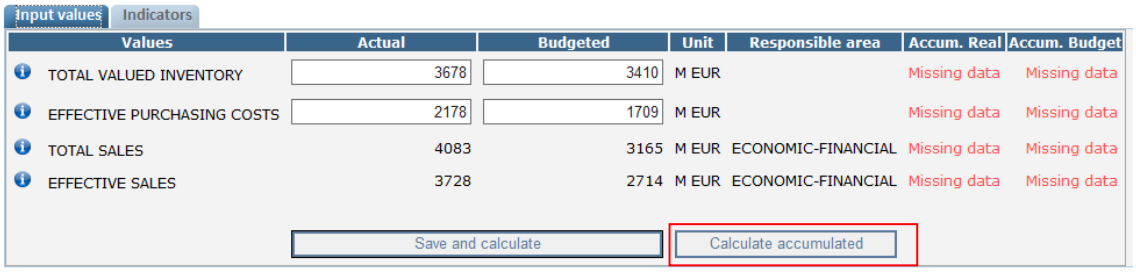
Indicators	Actual	Budgeted	Unit	Accum. Real	Accum. Budget
ANNUAL STOCK ROTATION	13.32	11.14	EUR	Missing data	Missing data
PURCHASING COSTS / EFFECTIVE SALES	58.42	62.97	%	Missing data	Missing data

Accumulated data is still missing

3º Calculate accumulated KPI's (budget and real)

Each KPI can be accumulated in different ways: average, total, calculation…

Once all the monthly KPI are calculated we are able to calculate accumulated data.



Values	Actual	Budgeted	Unit	Responsible area	Accum. Real	Accum. Budget
TOTAL VALUED INVENTORY	3678	3410	M EUR		Missing data	Missing data
EFFECTIVE PURCHASING COSTS	2178	1709	M EUR		Missing data	Missing data
TOTAL SALES	4083	3165	M EUR	ECONOMIC-FINANCIAL	Missing data	Missing data
EFFECTIVE SALES	3728	2714	M EUR	ECONOMIC-FINANCIAL	Missing data	Missing data

Very Important! : If we want to see accumulated data in the KPI report we need to complete this step. Otherwise only Monthly data would be available.

DATA VISUALIZATION

There are two options to launch the KPI report.

1- From the KPI app menu

2- From COGNOS portal
